PROFESSIONAL SUMMARY

Detail-oriented IT professional with 3 years of experience as a Content Moderator and a proven track record as a Product Support Analyst within the BPO industry. Skilled in reviewing user-generated content, enforcing strict community guidelines, troubleshooting complex product-related issues, and ensuring platform safety. Combines strong technical problem-solving capabilities and data analysis skills with an academic foundation in Information Technology to deliver high-quality technical support, optimize user experiences, and maintain regulatory compliance.

PROFESSIONAL EXPERIENCE

Product Support Analyst

Concentrix

2025 – 2025

- Troubleshoot and resolve complex product-related technical issues reported by users to maintain high satisfaction.
- Document, track, and report platform bugs and technical anomalies accurately to development teams for resolution.
- Provide actionable feedback and product usage insights to product managers and developers to guide future system improvements.
- Educate customers on best practices, helping them understand and optimize their use of the product.

Trust & Safety New Associate

Accenture

2022 – 2025

- Reviewed high volumes of user-generated content to identify and mitigate intellectual property violations.
- Assessed the authenticity of account ownership and provided data to optimize algorithms built to identify fraudulent accounts.
- Validated digital payment platform transactions to ensure absolute compliance with strict regulatory requirements.
- Evaluated and improved machine learning classifiers to ensure the platform remained safe and compliant for all audiences.

EDUCATION

Bachelor of Science in Information Technology

International Electronics and Technical Institute

2015 – 2020

- Core focus on software application design, database management, computer networks, and web development.

TECHNICAL PROJECTS

Personal Portfolio Website

Developer Project

- Designed and engineered a modern, responsive personal portfolio website from scratch to showcase BPO experience and technical capabilities.
- Implemented clean semantic HTML, custom CSS layout techniques, and interactive vanilla JavaScript components, including custom animations.

Task Management System

Developer Project

- Developed a responsive web-based task management application featuring an interactive user interface to track, organize, and prioritize daily workflows.
- Integrated Firebase for secure user authentication and real-time database synchronization, ensuring smooth data persistence across user sessions.
